MAINTENANCE ADVICES

*We thank you for purchasing one of our **AquaNess** devices.
We wish you lots of pleasure by using it.*

aquabiking or aquajogging.

*Hereby you will find some advices to use and keep your **AquaNess** in the best conditions.*

IMPORTANT => before using the AquaNess, control the PH of the water ! <=

*The **pH**, or potential hydrogen, means the concentration in water of ions of hydrogen. The percentage of pH exists between 0 and 14 ; the water of the pool have to be neutral or slightly basic.*

The water of your pool should have the best rate valid of pH 7,4

ATTENTION => The guarantee can't apply if the unbalanced pH is the reason of possible changes on the painting on the aluminum frame or on stainless steel bolting <=

- After using your **AquaNess** in the pool, please **rinse** it with fresh water, and **wipe** it (*don't forget underside of the saddle*)
- Do not use water treatment such as chemical treatment, when the bike is in the water or nearby.
- Pay attention to avoid any shock; don't let the device falling down.
- Shock impacts on the painting are not covered by the guarantee.
- When you do not use your bike or aqua treadmill, please store your **AquaNess** in a dry or well ventilated room.

Any breach on these maintenance tips will cancel the warranty.

**2 years warranty on any kind of manufacturing trouble(Frame, handlebar, crank set ...)
6 months warranty on any wear parts (saddle, handlebar, belts...)**

Please read carefully :

- The bike must be only used in a completely stable swimming pool
- The water lever never has to exceed the height of shoulders
- It is forbidden to modify the device and to use it for another purpose than pedaling in the water-
- The children minors have to use the device only under the supervision and the responsibility of their parents.
